

## Rochester Adams Robotics Team 245 Lakeview District Recap

Impact Award - Two thirds of the team made the trip to Lakeview

The AdamBots, FRC Team 245, had a very successful weekend at the Lakeview District Competition on March 5-7, 2026. The Team finished in 10<sup>th</sup> place out of 39 teams during the qualification rounds. We had at least three incidents where our robot took a big hit from a defensive robot from the other alliance, breaking items and even having wires damaged. Our very abled pit crew of eight students, with mentor supervision, worked diligently each time making the necessary repairs and we never missed a match. We finished the qualification rounds with a record of 6 wins and 6 losses.

We were selected by the number five alliance captain, FRC Team #8126, the Control Freaks from Vicksburg High School, as their first pick. They selected FRC Team #11386, Climax-Scotts PanterBots which is a rookie team from Climaxscotts High School, to complete the alliance. This was a great partnership, and the alliance finished the playoffs with a record of two wins and two losses (one by four points) and were a semi-finalist.

The Adambots earned the Impact Award, which is the most prestigious award at FIRST, and honors the team that best represents a model for other team to emulate and best embodies the mission of *FIRST*. This qualifies us to compete for this award at the Michigan State Championship, and it qualifies us to compete with our robot.

We will next compete at the Belleville District on March 19-21, 2026.
